CONDITIONAL USE PERMITS* (EXCERPT)

28.94.020 Findings.

In keeping therewith, the Planning Commission may permit, by issuance of a conditional use permit, any of the uses specifically enumerated in Section 28.94.030 upon a finding that:

1. Any such use is deemed essential or desirable to the public convenience or welfare and is in harmony with the various elements or objectives of the Comprehensive General Plan;
2. Such uses will not be materially detrimental to the public peace, health, safety, comfort and general welfare and will not materially affect property values in the particular neighborhood involved;
3. The total area of the site and the setbacks of all facilities from property and street lines are of sufficient magnitude in view of the character of the land and of the proposed development that significant detrimental impact on surrounding properties is avoided.
4. Adequate access and off-street parking including parking for guests is provided in a manner and amount so that the demands of the development for such facilities are adequately met without altering the character of the public streets in the area at any time.
5. The appearance of the developed site in terms of the arrangement, height, scale and architectural style of the buildings, location of parking areas, landscaping and other features is compatible with the character of the area. The Planning Commission shall have the authority to approve the design of open space. Design shall mean size, shape, location and usability for proposed private, public, or quasi-public purposes and development. Approval of such open spaces may be expressly conditioned upon an offer of conveyance by the owner to the City of Santa Barbara of the development rights, the right to prohibit the construction of additional buildings, or other property rights, necessary to achieve the purpose set forth in this title.
6. Compliance with any additional specific requirements for a conditional use permit.

The Planning Commission may impose such other conditions and restrictions upon the proposed use consistent with the Comprehensive General Plan and may require security to assure satisfactory performance of all conditions and restrictions. (Ord. 4945, 1996; Ord. 4152, 1982; Ord. 3710, 1974; Ord. 3045, 1965.)

28.94.030 Uses Permitted in Specific Zones.

The following uses may be permitted in the zones herein indicated upon the granting of a Conditional Use Permit, except that where another section of this Title specifically allows such use in a zone in conflict with this section, the provision of such other section shall apply and a Conditional Use Permit shall not be required.

It is hereby declared that in addition to being special uses as set forth in Sections 28.94.001 and 28.94.005, the uses permitted under this subsection are of such a nature that it is impractical to establish in advance of development the minimum requirements for parking, site area, setbacks, hours or manner of operation, lighting, landscaping, or other standards usually applied to classes or types of use, and that distinct and

different performance and development standards must be applied to each individual facility proposed to be established under these provisions.

This declaration is based on the fact that the type of club permitted by these provisions will usually be within the City area, unique in terms of the facilities provided, activities conducted, method and intensity of operation, relationship to topography and impact on surrounding urban development and potential, and that meaningful minimum standards can only be established in relation to the particular features of each individual development.

In lieu of prescribing herein minimum performance and development standards, the Planning Commission shall, as a part of any Conditional Use Permit issued to permit the establishment of outdoor tennis or lawn bowling clubs under this subsection, make the following findings and impose conditions necessary to secure and perpetuate the bases for such findings:

1. That the total area of the site and the setbacks of all facilities from property and street lines are of sufficient magnitude in view of the character of the land and of the proposed development that significant detrimental impact on surrounding properties is avoided.

2. That the prescribed hours and days of operation of the various facilities of the club are such that the character of the area is not altered or disturbed.

3. That the design and operation of outdoor lighting equipment will not be a nuisance to the use of property in the area.

4. That adequate access and off-street parking is provided in a manner and amount so that the demands of the development for such facilities are adequately met without altering the character of the public streets in the area at any time.

5. That the appearance of the developed site in terms of the arrangement, height, scale and architectural style of the buildings, location of parking areas, landscaping and other features is compatible with the character of the area.

If the unit is rented or leased to households not referred by the Housing Authority, the income level of the renter selected must be certified by the Housing Authority as to eligibility and this certification must be submitted to the Community Development Director. The Housing Authority may assess a fee for certification of renters other than those referred by the Housing Authority. The rent level for such low-income renters shall not exceed one twelfth (1/12) of thirty percent (30%) of the certified income of the renter. 16. In order to encourage the development of housing opportunities for disabled and handicapped individuals, the Planning Commission may allow reasonable deviation from the stated physical requirements where necessary to install features that facilitate access and mobility for disabled persons. Otherwise, no modification of the requirements for a Secondary Dwelling Unit shall be allowed unless specifically stated in this Section.

17. In addition to the findings required under Section 28.94.020, the Planning Commission, or City Council on appeal, must find that:

a. The Secondary Dwelling Unit does not overload the capacity of the neighborhood to absorb it or cause a concentration of such units sufficient to change the character of the single-family neighborhood in which it is located.

b. The Secondary Dwelling Unit does not detract from the privacy of the surrounding residents.

18. Modifications.

a. Parking. No modification of the required number of parking spaces shall be allowed. Modification of other parking-related requirements may be allowed subject to the provisions of Section 28.92.110 of this Code.

Any authorization granted by the conditional use permit shall terminate at that time.

The conditional use permit granted pursuant to this Subsection shall not be effective until the property owner has duly executed and recorded an instrument binding itself, its successors in interest and any person holding thereunder, which contains (i) notice of the conditional use permit, (ii) notice of any conditions established thereunder, (iii) an agreement to comply with the terms and conditions of the conditional use permit, (iv) a waiver of any claim that a temporary use or any improvements on real property creates any vested right to continue a non-conforming use after completion of the governmental action, and (v) any other conditions as deemed necessary to comply with the purposes and intent of this Subsection. This instrument shall be subject to the review and approval of the City Attorney and the Community Development Director.

(2) Separation: There is at least 100 feet between the base of the antenna support structure and the nearest dwelling unit.

(3) Access Control: The applicant establishes that the general public will be excluded from an area at least 50 feet in all directions from the antenna if antenna is not at least 10 feet off the ground. If the antenna is at least 10 feet above grade, this distance may be reduced to 30 feet.

(4) No Resource Impacts: The project will have no significant impact on any biological or archeological resources and will not generate additional traffic. The applicant may be required to provide information to the Community Development Director regarding these matters.

The Planning Commission may grant a waiver from height limitations if it finds that no feasible alternative location or design would not require such a waiver.

d. Non-ionizing Electromagnetic Radiation (NIER) Emissions.
